TITLE : DENTAL FROTH HOLDER

ABSTRACT : PURPOSE: To provide an easily usable froth holder which is integrally molded with a froth and in which a thread stretching part only of which disposable is attached to an exclusive grip part.

CONSTITUTION: In a dental froth holder wherein a thread stretching part 2 in which a dental froth is stretched, is incorporated to the other end of a grip part 3, the thread stretching part 2 is arranged so as to removably fit to the grip part 3 in either or both of directions parallel with and orthogonal to the axis of the grip part 3. Accordingly, the thread stretching part only of which is disposable, is attached to an exclusive grip holder so that an easily usable froth holder can be provided. Further, the thread stretching part 2 can be attached in two ways, and accordingly, the holder can be easily used for the front teeth or the back teeth.
